

Delopt India Develops Enterprise Class Network Video Management Software (V2217) with Integrated Video Analytics for Infinova

DELOPT India, a high technology company focused on the Security, Surveillance and Intelligent Transport Systems (ITS) market has worked closely with US based Infinova to develop the next generation enterprise class Network Video Management software (V2217) with integrated Video Analytics. The DELOPT & Infinova partnership will enable our existing and new customers the advantages of enterprise class features to seamlessly integrate next-generation, highly cost-effective, Security Surveillance Solutions. The V2217 Video Analytics are supported at the edge, at the server or embedded into the camera making this a truly scalable, open platform solution.

"This is a win-win-win combination for DELOPT, Infinova and their customers. The partnership is very unique, as we compliment each other's technologies and together we can provide our customers with reliable and cost-effective turnkey solutions. "

*Dr. M. R. Sheshadri
Managing Director, DELOPT, India*

Some of the unique advantages of the DELOPT / Infinova combination are:

- Multi System Control Center
- Image Content Navigation
- 2.5D Embedded Live Video Maps
- Web Client & Video Wall
- Edge / Server/ Embedded Based Multi Rule Analytics

The Video Analytics can run single or multi analytic rules simultaneously irrespective of the platform selected. Also, DELOPT has released a Video Analytics Library / SDK for integrating it to existing Infinova V2216 Video Management Software.

"As security and surveillance solutions become more sophisticated with advanced video analytics tools, such as the ones we have integrated from DELOPT, are vital for forensic analysis and to create better quality and more reliable evidence."

*Dr. Jeffery Liu
President, Infinova, USA*

Both DELOPT and Infinova have many years of experience in delivering high-performance solutions for customers in Defense, Security / Surveillance and Intelligent Transportation Systems (ITS) domains. Some of the technologies covered are:

Security & Surveillance:

- Enterprise Video Management
- Video Analytics
- Intrusion Detection Systems. (IntruDetect, IntruTrak & IntruZoom)
- People Counting System (Retail Intelligence)
- License Plate Recognition (Secure Entry / Exit, Parking Management)
- Parking Management & Guidance System
- Intelligent Vehicle Access Control System
- Perimeter Intrusion Detection System
- Thermal Imagers

Intelligent Transportation Systems:

- City / Junction Surveillance System
- Dome Enforcement Systems
- Red Light Violation Detection Systems
- Speed Violation Detection Systems
- Toll Management & Enforcement Systems

Infinova

Complete security solutions — from the Control Room to the Cameras Infinova is a high-end technology manufacturer of complete solutions with industry-leading customer service. Our products are manufactured at Infinova facilities under strict production and quality controls that are certified to ISO 9001 standards.

We provide complete security and surveillance solutions that stretch from the:

- Control Room with network video management, matrix switchers, access control, communications and control equipment etc.
- To the cameras where we have a range of access control devices, IP, megapixel and analog cameras for different applications.

By complete solution we do not mean proprietary, we integrate with technology from many different manufacturers. The difference is, we are responsible for reliability and quality of your complete solution, you have one supplier to work with, Infinova.

DELOPT

Turnkey Solution Partner for your Security, Surveillance & ITS needs DELOPT is a focused high technology manufacturer & leading solution innovator for Security, Surveillance & ITS markets. In addition above, DELOPT also provides design, development and production services in Embedded Systems, Electro-Optics systems, Avionics & Display systems for Defense Applications.
