

Infinova and Video Insight Enterprise Join together in Creating the Optimum IP Surveillance

Infinova' high performance IP video cameras and systems now integrate with Video Insight Enterprise class IP Video surveillance systems.

Infinova IP cameras support MPEG-4 for efficient recording and viewing. Available as V6600 IP mini domes and the V1700N IP PTZ dome cameras, they are ideal for any network surveillance installation, indoors or out. Vandal resistant metal construction, IP66, and with an integrated heater/blower, these IP cameras set a new standard for rugged security-grade operation. The most demanding requirements are easily met with high performance MPEG-4 technology that provides video at 4 CIF and 30/25 fps.

The Video Insight IP video surveillance system is an easy to use system for viewing live and recorded video from IP based cameras. The system is tailored to accommodate multi-location installations especially for education, hospitals, and government. Live and recorded video can be viewed using a full featured Windows Client or the Web Client. The system is scalable to over 100 cameras per server and unlimited servers. All servers and cameras can be centrally managed and configured. Using maps, floor plans, and customizable layouts, the end user easily navigates between locations and cameras. The system has been developed using open technologies and is fully integrated with access control systems. The Video Insight product suite offers a high end solution at a reasonable price. Due to the highly efficient use of processing, bandwidth, and storage, the total cost of ownership for Video Insight solutions is extremely cost effective. There are no hidden extra fees for remote viewing, PDA, or site licenses.

Infinova is an international innovator and manufacturer of complete security/surveillance solutions that deliver the highest value to customers while providing the cutting edge technology necessary to meet today's stringent security needs. Included in Infinova's products are dome PTZ cameras, networkable matrix switchers, fiber optic transmission systems for video, audio, data and integration management software. Infinova provides consultants, integrators, electrical contractors and installers with engineering design assistance and customized systems. Infinova products are extensively used worldwide in the industrial and commercial facilities.

Video Insight is a US based developer of sophisticated multi campus video surveillance software. Our systems have been installed on over 4500 campuses including major school districts, universities, and hospitals. Founded in 2002, Video Insight's mission is to protect the next generation of Americans by providing intelligent, easy to use IP security solutions.
