

## **Infinova IP/Megapixel Cameras Integrated with Nice Systems**

MONMOUTH JUNCTION, NJ - May 6, 2010 - Infinova today announced that Infinova dealers and integrators will be able to help their customers enhance their security operations and improve performance using intelligent digital video solutions with Infinova IP and megapixel cameras running on NICE Systems' NiceVision®. As a result, Infinova dealers and integrators will be able to integrate real-time analysis, IP networking, recording and management to enable automatic threat detection, instant verification, event resolution and effective investigation in their customers' video surveillance solutions.

"Our partnership with NICE Systems is another example of how we are helping Infinova dealers and integrators say 'yes' to more projects," emphasizes Mark S. Wilson, Infinova vice president, marketing. "Using Infinova's popular IP and megapixel cameras in tandem with NiceVision, users can focus on fast and informed decision-making, instead of monotonous detection tasks, enabling the timely management of suspicious events before they become serious incidents."

The NICE video surveillance solution is part of the NICE security offering which enables the capture of security, safety and operational data from multiple sensors and systems, including audio, video, radio, web, and more. It offers content analysis for immediate and relevant insights and provides a framework for fusing data silos into a single, holistic view, delivering real-time situational awareness and incident management. The NICE offering provides real-time capabilities for handling security events to mitigate and prevent risk, as well as faster, more accurate and reliable post-event investigation capabilities.

### **About Infinova**

Infinova makes it possible for IP and analog surveillance cameras and equipment to co-exist and be managed as a single seamless system solution, helping integrators generate more business by being able to say "yes" to a broader scope of projects. Infinova provides megapixel, IP and analog surveillance cameras, including specialized cameras, control room equipment, fiber optic communications and customized systems. The Infinova solution enables end-users to extend the life of their existing analog equipment by having it co-exist with their new IP video equipment. Infinova partners with brand-leader manufacturers to create best-in-class solutions and certifies the functionality of their partners' solutions when integrated with Infinova products. Infinova is acknowledged in the industry for its exceptional customer service programs and is often called "the integrator's manufacturer."

### **About NICE Systems**

NICE Systems (NASDAQ: NICE) is the leading provider of Insight from Interactions solutions and value-added services, powered by advanced analytics of unstructured multimedia content - from telephony, web, radio and video communications. NICE's solutions address the needs of the enterprise and security markets, enabling organizations to operate in an insightful and proactive manner, and take immediate action to improve business and operational performance and ensure safety and security. NICE has over 24,000 customers in more than 150 countries, including more than 80 of the Fortune 100 companies. More information is available at <http://www.nice.com>.
