

Infinova Introducing 2.0 Megapixel, H.264/MJPEG Camera

MONMOUTH JUNCTION, NJ - September 14, 2010 - Infinova today announced that it will introduce its new V6921-G Series 2.0 megapixel network zoom minidome cameras with a 1/2.5-inch progressive scan CMOS sensor and 10X optical zoom lens at Booth 1447 during the ASIS International Seminar and Exhibition to be held October 12-15 in the Dallas Convention Center and at IFSEC India to be held November 23-25 in Mumbai. With a high resolution of 2.0 megapixel and 10X zoom, these cameras can capture the smallest details in different light conditions. They deliver excellent and reliable image quality while working in a networked environment and are an ideal choice for every surveillance application.

"Users want the flexibility to adopt optimum resolutions based on their network bandwidth, illumination conditions and storage capacity," emphasizes Mark S. Wilson, Infinova vice president, marketing. "The V6921-G series cameras support H.264 high profile and MJPEG video compression formats for easily viewing video in limited bandwidth networks and storing the video footage data. Their maximum resolution reaches 1920 x 1080 in the H.264 format."

The V6921-G series cameras also provide additional functions, such as an optional SD card for local recording up to 32GB, bidirectional audio, multiple options to process alarms and privacy mask. In addition to a separate power supply, they can work on power over Ethernet (PoE). They are available in surface, pendant and recessed mount configurations.

About Infinova

Infinova makes it possible for IP and analog surveillance cameras and equipment to co-exist and be managed as a single seamless system solution, helping integrators generate more business by being able to say "yes" to a broader scope of projects. Infinova provides megapixel, IP and analog surveillance cameras, including specialized cameras, control room equipment, fiber optic communications and customized systems. The Infinova solution enables end-users to extend the life of their existing analog equipment by having it co-exist with their new IP video equipment. Infinova partners with brand-leader manufacturers to create best-in-class solutions and certifies the functionality of their partners' solutions when integrated with Infinova products. Infinova is acknowledged in the industry for its exceptional customer service programs and is often called "the integrator's manufacturer."
