

Infinova Names Stephan G. Cannellos Vice President of Strategic Business Development

MONMOUTH JUNCTION, NJ - March 7, 2011 - Infinova today announced that Stephan G. Cannellos has joined the company to work with management on company strategy, acquisition processes and help new acquisitions integrate into Infinova.

"We have always grown Infinova organically," reports Infinova President and CEO Jeffrey Liu. "However, since completing our \$300 million IPO in December, we are starting to look for suitable technology companies to form partnerships and alliances that will advance Infinova solutions and acquisition of complementary companies to grow our market share. We look forward to Stephan helping us accomplish this."

"Infinova is on the precipice of being a major international player in the video security industry," asserts Cannellos. "Through its own R&D department, which includes over 290 engineers, Infinova already provides core equipment for video control rooms, megapixel, IP and analog surveillance cameras, specialized cameras, fiber optic communications products and customized systems. Strategic acquisitions will help the company grow even faster and provide Infinova integrators with even more solutions to propose to their customers."

Cannellos joins Infinova with an extensive background in general management, sales, marketing and acquisitions with leading management posts at security industry leaders Assa Abloy, Tyco and Software House. He has also been with GE and showed success at three venture-backed technology start-ups. Cannellos lives in Westford, Mass. and has a bachelor's degree in mechanical engineering and a master's degree from Clarkson University.

More information on Infinova video systems is available by going to www.infinova.com.

About Infinova

With solutions that enable end-users to extend the life of their existing analog equipment by having it co-exist with their new IP video equipment, Infinova provides core equipment for video control rooms, megapixel, IP and analog surveillance cameras, specialized cameras, fiber optic communications products and customized systems. Infinova is acknowledged for its exceptional customer service programs as "the integrator's manufacturer."
