

Infinova Ranked No. 24 in 2011 Security 50

MONMOUTH JUNCTION, NJ – May 17, 2012 - Infinova was ranked No. 24 in the A&S 2011 Security 50 at the Security 50 Event organized by Messe Frankfurt New Era Business Media on April 18 at the 15th Secutech International Security Exhibition in the Taipei Nangang Exhibition Center, Taipei, Taiwan.

Security 50 exhibits the top 50 companies in the physical security industry based on product revenue. It examines the financial performance of manufacturers to measure the industry's health and is one of the most authoritative rankings in the industry.

At the opening ceremony, representatives from top the 50 companies and international buyers gathered to discuss the latest products and trends, including the migration from analog to IP. Executives from global brands and Asian manufacturers shared their business strategies and success stories.

Gaining the No. 24 position in the Security 50 ranking was result of Infinova's strong performance and customers' acceptance of its products. As a result of its April, 2012, acquisition of Canada based March Networks, a leading provider of intelligent IP video solutions, Infinova has climbed into the top 10 of global video surveillance manufacturers. Its product line expands with the addition of March's VMS and vertical market solutions, especially in banking and retail, and its customer base grows with the addition of many blue chip customers.
