DESCRIPTION

Based on deep-learning algorithm, Infinova V1421MN series HD network explosion proof camera is endowed with vivid smart functions and video structuring functions such as face detection, pedestrian detection, motor vehicle detection and non-motor vehicle detection. It's able to output target attributes and images to the backend platform for big data analysis, which effectively reduces loads and costs of smart analysis and handling that the control platform bears. The camera can also connect to Infinova's smart structured big-data platform seamlessly. Standard http protocol and SDK are provided to connect to the third-party platform.

The camera has a built-in HD integrated camera module, utilizes large size progressive scanning CMOS sensor and has an internal 30X optical zoom lens. It provides high quality video with the resolution up to 1920x1080@60fps, adopts H.265/H.264/M-JPEG /SVC compression formats, outputs four video streams and boasts of excellent resolution and color reproduction ability to ensure richer and more accurate details to be acquired and also guarantee the accuracy of intelligent analysis in a more effective way.

This camera adopts explosion proof shield design, which can protect the webcam and the lens from damaging themselves under the outside explosion environment. The explosion proof shield structure as a whole is in cylindrical shape. The front end is flange cover while its rear end is cable flange cover. Window glasses made of toughened glasses are compressed on the flange cover by junk ring and sealed by specified sealant with O-ring. Rear cover is connected to the flange of cylinder through screws and is sealed by O-ring with specified rubber sealing ring. The base is linked to the cylinder by stainless steel hoop band.

All products shall meet the provisions of standard Ex db. IIC T6 Gb (-40 °C ≤ Ta ≤ +60 °C) /EX tb IIIC T80°C Db (-40°C≤Ta≤+60°C), IP66. They can be applied to the explosion environment (excluding mines) caused by the mixture of combustible gases and air. Boasting of IP66, the dust proof and water proof environmental rating, it means the dust cannot intrude into the products and there will be no damage to products when using water to clean them.
