

Case Study

Kuwait Finance House

Large Multi-National Bank spans 46 locations in 4 countries. The latest implementation includes IP cameras

Solution: Infinova IP and analog cameras and DVRs

Over 1300 Infinova Cameras and 80 DVRs Help Protect Kuwait Finance House

All transactions and activities in each location of the Kuwait Finance House bank are under the surveillance of Infinova indoor/outdoor, infrared, minidome and PTZ dome cameras. Video is recorded in continuous mode with Infinova high- definition H.264 DVRs. Kuwait Finance House, headquartered in Kuwait City with international operations in Bahrain, Malaysia and Turkey, is using over 1,300 Infinova high-resolution fixed and PTZ dome cameras plus 80 Infinova DVRs to watch over its 46 locations. In the bank's new administration building, the organization is migrating to Infinova megapixel cameras and NVR software.

"Kuwait Finance House is continually expanding, often opening new branches in remote areas," reports Mark S. Wilson, Infinova vice president, marketing. "Due to the modular design and flexibility of Infinova surveillance products, these new branches can be directly added to the existing system quickly and efficiently."

Each Kuwait Finance House branch deploys 32 to 48 Infinova cameras. Infinova DVRs are connected to the central control room located at the home office via a 512 Mbps DSL line and monitored by security personnel using Infinova remote client software. Recorded images are verified and produced upon request.

Infinova[®]
The Integrator's Manufacturer

Infinova mobile DVRs are used for the bank's mobile branches which are set up in vans containing an ATM and other banking services. Each mobile branch uses between four to six Infinova cameras which record on a continuous mode on Infinova mobile DVRs. Removable hard disks are copied to central storage once the disk is full.

At the new administrative building, Kuwait Finance House has implemented 45 Infinova megapixel cameras and NVR software plus a storage capacity of 9TB.

Infinova[®]

By helping channel partners provide their customers with complete, affordable, best-in-class, large and small video surveillance solutions, Infinova helps integrators generate more business more profitably. Leveraging a manufacturing process certified to ISO 9001:2000 standards and over 250 engineers with a list of video industry firsts, Infinova channel partners provide their end-users with industry-acknowledged product reliability and technical leadership.

So that Infinova channel partners can create complete solutions, Infinova provides IP surveillance cameras and components, CCTV analog cameras, DVRs and components, camera accessories, monitors, power supplies and fiber optics communications devices. Infinova also has the technical ability and manufacturing flexibility to let integrators propose customized solutions. In addition, Infinova will partner with other manufacturers making other surveillance equipment and software to help its channel partners create turnkey solutions. Contrary to most other companies, Infinova will back-up their partners' products as well as its own to assure both the integrator and its customers that one call – to Infinova only – takes care of everything.

Infinova works diligently to assure its channel partners can provide cost-conscious solutions. With Infinova's hybrid systems, channel partners can propose systems that protect a customer's investment in its already-installed analog surveillance system but that also put them on a dynamic migration pathway to IP systems.

Infinova is lauded for its exceptional maintenance programs. A major highlight is the company's 24-hour advanced replacement policy in which a substitute product is shipped immediately upon notice of a problem.

With such customer focus, Infinova is often referred to as "the integrators' manufacturer."
