

Infinova Offers a High Performance Line of Network Cameras

After success with our industry leading IP PTZ dome cameras, Infinova has announced the release of a complete line of IP fixed minidomes for all applications. The Infinova V6600 IP minidomes support MPEG-4 for efficient recording and viewing. Available with vari-focal lenses in color or true day/night, they are ideal for any network surveillance installation, indoors or out. Vandal resistant metal construction, IP66, and with an integrated heater/blower, these IP minidomes set a new standard for rugged security-grade operation. They work along with our existing V1700N IP PTZ dome cameras to provide a complete solution. The most demanding requirements are easily met with high performance MPEG-4 technology that provides video at 4 CIF and 30/25 fps. These cameras are managed by our V2215 NVR surveillance suite and are also compatible with other leading surveillance applications.

Infinova is a manufacturer of complete security/surveillance solutions that deliver the highest value to customers while providing the cutting edge technology necessary to meet today's stringent security needs. Included in Infinova's products are dome PTZ cameras, networkable matrix switchers, fiber optic transmission systems for video, audio, data and integration management software. Infinova provides consultants, integrators, electrical contractors and installers with engineering design assistance and customized systems.
