

Infinova Received Prestigious Frost & Sullivan Award for IP Video

## **INFINOVA RECEIVED PRESTIGIOUS FROST & SULLIVAN AWARD FOR IP VIDEO**

### **2007 "Product Innovation Leadership of the Year in IP Video"**

October 16, 2007, Monmouth Junction, New Jersey, USA

Infinova today announced that it was awarded the 2007 "Product Innovation Leadership of the Year in IP Video" for network video product development and innovation leading to its Infi-Net™ series IP video surveillance products. This award underscores Infinova's commitment and advances in IP video and convergence with traditional systems and recognizes Infinova as a leading innovator in the industry.

The award is presented to companies that have demonstrated excellence in new technology and product development within their respective industries. Frost & Sullivan awarded Infinova this coveted honor at its Building Technologies Summit held today in New Delhi, India. In the past, Siemens Medical and Healthcare products and Honeywell Automatic Control products were honored with this award. This award recognizes Infinova's long time innovation in electronic security, particularly, Infinova's leadership in digital and networking video surveillance.

The Infinova Infi-Net™ security systems provide for complete end to end IP solutions that integrate with traditional security systems allowing the choice for IP, analog or hybrid systems to meet its customers'needs.

Infinova introduced the industry's first industrial grade high speed PTZ dome camera with built-in video server. Presently, Infinova offers IP video in various formats including H.264, MPEG-4 and M-JPEG. They are available built into its fixed cameras, mini dome cameras, high speed PTZ domes, and high speed integrated PTZ cameras. Recently, Infinova integrated powerful DSP video analytics into its cameras for "intelligence at the edge".

Infinova was the first to introduce the Ethernet networkable video matrix switchers. This innovation allowed satellite switcher control and interconnection over the IP network, replacing older RS-232/RS-485 serial line technology.

Infinova's networked security products also include network video recorders and network video management software. In the access control line, Infinova offers networked control panels and card readers.

**About Infinova**

Infinova is a manufacturer of complete analog and network security surveillance products that deliver the highest value to customers with the cutting edge technology. Included in Infinova's product lines are cameras, DVRs, NVRs, matrix switchers, fiber optic transceivers, access control, and management software. Infinova provides outstanding technical support and customized solutions. For further information, visit [www.infinova.com](http://www.infinova.com).

**About Frost & Sullivan**

Founded in 1961, Frost & Sullivan is recognized as a global leader in growth consulting. Frost & Sullivan Awards are presented to companies that demonstrate excellence in their industry, commending the diligence, commitment, and innovative business strategies required to advance in the global marketplace. Frost & Sullivan rigorously analyzes specific criteria to determine award recipients in a vast variety of market industries and landscapes.
