

## **Infinova IP/Megapixel Cameras Integrated with Milestone Systems XProtect™ Video Management Software**

MONMOUTH JUNCTION, NEW JERSEY - September 2, 2010 - Infinova today announced that, at Booth 1447 during the ASIS Seminar and Exhibition to be held October 12-15 at the Dallas Convention Center and at IFSEC India to be held November 23-25 in Mumbai, it will showcase its partnership with Milestone. Now, Infinova integrators and distributors can help customers control video surveillance, reduce maintenance costs and protect their business environment by offering Infinova Megapixel and IP cameras installed with Milestone Systems XProtect Video Management software. Since Milestone products are based on an open platform that uses the TCP/IP network protocol, Infinova integrators and their customers will be able to build the video surveillance solutions using standard video and computer hardware.

"Milestone software supplies the basis for highly efficient operations of video monitoring and analysis and opens up a wide spectrum of opportunities for integrating with other business applications in any IT environment," emphasizes Mark S. Wilson, Infinova vice president, marketing. "This is a further example of how we are helping Infinova integrators say 'yes' to more opportunities."

"Megapixel cameras are helping to drive the uptake of IP technology in the video surveillance industry. Milestone's support of Infinova's new family of network cameras including megapixel capability will help customers leverage the advantages of this," says Friborg Jacobsen, VP Strategic Alliances, Milestone Systems.

Introduced in March of this year at the ISC West Convention in Las Vegas, Infinova's full new family of IP and megapixel cameras features Texas Instruments' Da Vinci chip; includes fixed, mini-dome and high-speed megapixel dome PTZ cameras; provides both analog and digital operation at up to 3 megapixel resolution, including megapixel resolution at 20 frames per second (fps); offers on-camera SD (secure digital) storage cards; and is ruggedized. The cameras also provide high quality video 360 degree continuous rotation with pans at both high and low speeds.

More information on Infinova IP and megapixel camera solutions is available at [www.infinova.com](http://www.infinova.com).

### **About Infinova**

Infinova makes it possible for IP and analog surveillance cameras and equipment to co-exist and be managed as a single seamless system solution, helping integrators generate more business by being able to say "yes" to a broader scope of projects. Infinova provides megapixel, IP and analog surveillance cameras, including specialized cameras, control room equipment, fiber optic communications and customized systems. The Infinova solution enables end-users to extend the life of their existing analog equipment by having it co-exist with their new IP video equipment. Infinova partners with brand-leader manufacturers to create best-in-class solutions and certifies the functionality of their partners' solutions when integrated with Infinova products. Infinova is acknowledged in the industry for its exceptional customer service programs and is often called "the integrator's manufacturer."

### **About Milestone**

Founded in 1998, Milestone Systems is the leading global developer of open platform IP video management software. XProtect™ gives users a powerful surveillance solution that is easy to manage, reliable and proven in more than 50,000 customer installations. With support for the industry's widest choice in network hardware and integration with other systems, XProtect provides best-of-breed solutions to "video enable" organizations - reducing costs, optimizing processes, protecting people and assets. With headquarters in Denmark and ten international offices, Milestone software is sold through authorized partners in 107 countries.
