

Infinova's Pressurized Dome Cameras Watch Panama Canal

MONMOUTH JUNCTION, NJ - August 26, 2010 - Infinova today announced that its V1750A pressurized dome cameras have been placed on both sides of the Panama Canal to view ships and vessels waiting their turn to go through the locks. They are watching to verify that vessels stay within their assigned spaces while waiting. If ships stray, they can cause damage to the channel and locks when they hit the sides and equipment. The cameras provide evidence of negligence by ship crews and enable canal authorities to penalize rule breakers.

"Providing visual verification at one of the world's iconic locations by helping provide order and administrative efficiency is a duty that Infinova takes very seriously," reports Mark S. Wilson, Infinova vice president, marketing. "Our pressurized domes were designed to stand up to the environmental challenges of locations such as the Panama Canal."

Infinova's rugged V1750A series pressurized PTZ dome cameras feature a nitrogen pressurized environment inside the housing with a stainless steel rim for maximum protection against airborne contaminants and moisture. Special valves minimize decrease in pressure over time. Solid-state sensors in the housing relay important system information, such as internal temperature and pressure readings, back to the control center. Non-volatile memory in the housing enables automatic downloads of camera presets and other data in the event that the camera and drive module must be replaced. More information on Infinova video surveillance solutions is available at www.infinova.com.

About Infinova

Infinova makes it possible for IP and analog surveillance cameras and equipment to co-exist and be managed as a single seamless system solution, helping integrators generate more business by being able to say "yes" to a broader scope of projects. Infinova provides megapixel, IP and analog surveillance cameras, including specialized cameras, control room equipment, fiber optic communications and customized systems. The Infinova solution enables end-users to extend the life of their existing analog equipment by having it co-exist with their new IP video equipment. Infinova partners with brand-leader manufacturers to create best-in-class solutions and certifies the functionality of their partners' solutions when integrated with Infinova products. Infinova is acknowledged in the industry for its exceptional customer service programs and is often called "the integrator's manufacturer."
