

Enhanced Perimeter Security: Infinova and Fibertron Team Up

March 2, 2013 – **Infinova** and **Fibertron** team up to doubly secure intrusion into the most vulnerable area as per a customer perspective, the perimeter walls of their property. **Infinova** and **Fibertron** will work together to provide its customers one –stop solution for High Definition IP Video Surveillance and Fiber Optic Intrusion Detection system. **Infinova** and **Fibertron** together have several installations across ministries of foreign affairs and embassies belonging to foreign affairs across the Middle East.

Infinova is a one source solution provider for a complete range of CCTV surveillance system, fibre optic communication and security management software. Infinova's best-in-class solution encompasses a wide spectrum of product technology to meet the security needs of government, industry, banking, retail, and service companies across the globe. Infinova's industry experience in HD Megapixel, IP, Analog and Fiber Optics reinforces its reputation for flexibility with both integrators and end users. With its acquisition of March Networks, Infinova now stands strong into the financial, banking and retail sector. Since Infinova is a manufacturer, they have full control over the design and specification of its products. This gives their channel partners, the flexibility to meet specialized project requirement, where customized solutions are needed.

Fibertron is a leading manufacturer of innovative Fiber Optic Security & Safety Systems based on Optical Radar technology. Fibertron offers 3 types of Perimeter Intrusion Detection Systems - **FOSM** (Fiber Optic Security Mesh), **FMSW** (Fence Mount Sensing Wire) and **SWF** (Sensing Wire Fence) and 1 Suicide Fall Prevention and Alarm System - SWN (Sensing Wire Net).

The Sensing Wires based on Fiber Optic Security Mesh technology not only provides a highly cost-effective solution, but also overcomes limitations of a Vibration sensor or a Taut Wire sensor technology.

Fibertron has numerous installations in Government and Military organizations, Oil and other Industries across several countries. The performance of Fibertron system has been extremely stable and effective, with several official performance certificate issued by various government agencies. The Fibertron system is the only system capable of differentiating a real threat from false alarms and has been rated "Best in the world" by many of its customer base. Fibertron systems offers a unique solution that is capable of providing 100% flawless detection of intrusion attempts of any kind, from underground to fence climbing, regardless of terrain conditions and fence types without generating false alarms.
