

Infinova Showcased Latest Surveillance Solution in IFSEC India 2013

At IFSEC India 2013 on booth # G21 (Hall 3), Infinova, a pioneer in the security industry and a leading provider of world-class unified IP security solutions, demonstrated the latest HD T-series IP PTZ camera, 360-degree camera and video management solutions. We had a large booth space with 99sq.m. shared equally with Wavesight, a UK based leader in design, manufacture and application of outdoor point-to-point and multipoint wireless communications solutions.

Also showcased on the booth were 6 LCD screens running Infinova cameras, corporate profile and March Networks videos. Mangalore city surveillance combined with Infinova cameras and Wavesight wireless radio also displayed on the screen. Infinova VMS V2217, running on one of the screens, was definitely a standout. Visitors were interested in the simplicity of the software and the multilingual features, which definitely brings value in a country like India. The explosion proof camera was a blockbuster on the booth as the visitors showed interest in the product.

The show was a great success since new potential contacts were developed which will be a positive professional relationship. On the First day of the event, we could capture a robbery event live on the adjacent booth. Infinova camera captured the entire event with the gang of 3 robbers plotting to rob a laptop bag and vanish from the scene.
